

# Do You Understand What Your Crusader® Engine is Saying?

## PowerView™ Does.

Your Crusader electronic engine doesn't speak English. It talks in bits and bytes and codes. FW Murphy's PowerView display is the simplest and most powerful way to know what your engine is telling you.

PowerView reads your engine's health statistics, and translates diagnostic codes into plain English (as well as Spanish, French and German). It puts the information where it's needed most – right at the user's fingertips.

PowerView displays several different engine or transmission parameters and service codes on a large graphical backlit LCD screen. It can show either a single parameter or a quadrant display that includes four parameters simultaneously. Plus, this special Crusader version of PowerView can display fuel consumption – including average fuel, instantaneous fuel and trip fuel. Two PowerViews can also connect to twin engines with a single harness. You get less wiring, fewer points of failure and reduced installation labor costs.
